	Aug- Sep	Sep - Oct	Nov-Dec	Jan-Feb	Mar-Apr	May
My Math Chapters	Ch 1-2	Ch 3-5	Ch 6-7	CH 8-10	Ch 10	Ch 11-12
Operations and A	Algebraic Th	inking (OA)				
4.OA.A Use the four operations v	with whole n	umbers to s	solve proble	ms.		
4.OA.A.1 Interpret a multiplication equation as a comparison, e.g.,						
interpret 35 = 5 x 7 as a statement that 35 is 5 times as many as 7 and 7		•				
times as many as 5. Represent verbal statements of multiplicative						
comparisons as multiplication equations.  4.OA.A.2 Multiply or divide to solve word problems involving multiplicative						
comparison, e.g., by using drawings and equations with a symbol for the						
unknown number to represent the problem, distinguishing multiplicative		•				
comparison from additive comparison.						
4.OA.A.3 Solve multistep word problems posed with whole numbers and						
having whole number answers using the four operations, including						
problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity.	•	•	•			
Assess the reasonableness of answers using mental computation and						
estimation strategies including rounding.						
4.OA.B Gain familiarit	y with factor	s and multi	ples.			
4.OA.B.4 Find all factor pairs for a whole number in the range 1-100.						
Recognize that a whole number is a multiple of each of its factors.						
Determine whether a given whole number in the range 1-100 is a multiple		•		•		
of a give one-digit number. Determine whether a given whole number in						
the range 1-100 is prime or composite.  4.OA.C Generate	and analyz	o pottorno				
4.OA.C.5 Generate a number or shape pattern that follows a given rule.	anu anaiyz	e patterns.	<u> </u>			
Identify apparent features of the pattern that were not explicit in the rule						
itself. For example, given the rule "Add 3" and the starting number 1,			_			
generate terms in the resulting sequence and observe that the terms			•			
appear to alternate between odd and even numbers. Explain informally						
why the numbers will continue to alternate in this way.		D T				
Number and Op			.td l			
4.NBT.A Generalize place value und 4.NBT.A.1 Recognize that in a multi-digit whole number, a digit in one	ierstanding	ior muili-aig	jit whole nu	mbers.	1	
place represents ten times what it represents in the place to its right. For						
example, recognize that $700 \div 70 = 10$ by applying concepts of place	•	•	•			
value and division.						
4.NBT.A.2 Read and write multi-digit whole numbers using base-ten						
numerals, number names, and expanded form. Compare two multi-digit	•					
numbers based on meanings of the digits in each place, using >, =, and <						
symbols to record the results of comparisons.  4.NBT.A.3 Use place value understanding to round multi-digit whole						
numbers to any place.	•	•	•			
4.NBT.B Use place value understanding and pro	perties of o	perations to	perform m	ulti-digit arit	thmetic.	
4.NBT.B.4 Fluently add and subtract multi-digit whole numbers using the	_			J		
standard algorithm.	•					
4.NBT.B.5 Multiply a whole number of up to four digits by a one-digit						
whole number, and multiply two two-digit numbers, using strategies based		•				
on place values and the properties of operations. Illustrate and explain the		] -				
calculation by using equations, rectangular arrays, and/or area models.  4.NBT.B.6 Find whole-number quotients and remainders with up to four-						
digit dividends and one-digit divisors, using strategies based on place						
value, the properties of operations, and/or the relationship between			•			
multiplication and division. Illustrate and explain the calculation by using						
equations, rectangular arrays, and/or area models.						
Number and O						
4.NF.A Extend understanding	of fraction e	quivalence	and orderin	g.	1	
<b>4.NF.A.1</b> Explain why a fraction <i>a/b</i> is equivalent to a fraction ( <i>n</i> x <i>a</i> )/( <i>n</i> x <i>b</i> ) by using visual fraction models, with attention to how the number and						
size of the parts differ even though the two fractions themselves are the				•		
same size. Use this principle to recognize and generate equivalent						
fractions.		<u> </u>	<u></u>			
4.NF.A.2 Compare two fractions with different numerators and different						
denominators, e.g., by creating common denominators and numerators,						
or by comparing to a benchmark fraction such as ½. Recognize that				•		
comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols >, =, or <, and				_		
justify the conclusions, e.g., by using a visual fraction model.						
jaoui, in a demonation of orget by doing a visual naction model.	1	1	1	1	ı	1

My Math Chapters	Ch 1-2	Ch 3-5	Ch 6-7	CH 8-10	Ch 10	Ch 11-12
4.NF.B Build fractions from unit fractions by applying and ex 4.NF.B.3a Understand a fraction a/b with a > 1 as a sum of fractions 1/b.	tenaing prev	lous under	standings o	roperations	s on whole r	iumbers.
a) Understand addition and subtraction of fractions as joining and						
separating parts referring to the same whole.						
<b>4.NF.B.3b</b> Understand a fraction $a/b$ with $a > 1$ as a sum of fractions $1/b$ .						
b) Decompose a fraction into a sum of fractions with the same						
denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model.				•		
Examples: $3/8 - 1/8 + 1/8 + 1/8$ ; $3/8 = 1/8 + 2/8$ ; $2/8 = 1 + 1 + 1/8 = 8/8$						
+ 8/8 + 1/8.						
<b>4.NF.B.3c</b> Understand a fraction $a/b$ with $a > 1$ as a sum of fractions $1/b$ .						
c) Add and subtract mixed numbers with like denominators, e.g., by				_		
replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and				•		
subtraction.						
<b>4.NF.B.3d</b> Understand a fraction $a/b$ with $a > 1$ as a sum of fractions $1/b$ .						
d) Solve word problems involving addition and subtraction of fractions				•		
referring to the same whole having like denominators, e.g., by using visual fraction models and equations to represent the problem.				•		
4.NF.B.4a Apply and extend previous understandings of multiplication to						
multiply a fraction by a whole number.						
a) Understand a fraction a/b as a multiple of 1/b. For example, use a				•		
visual fraction model to represent 5/4 as the product 5 x (1/4), recording						
the conclusion by the equation 5/4 = 5 x (1/4).  4.NF.B.4b Apply and extend previous understandings of multiplication to						
multiply a fraction by a whole number.						
b) Understand a multiple of a/b as a multiple of 1/b, and use this						
understanding to multiply a fraction by a whole number. For example, use				•		
a visual fraction model to express 3 $x$ (2/5) as 6 $x$ (1/5), recognizing this product as 6/5. (In general, n $x$ (a/b) = (n $x$ a)/b.)						
4.NF.B4c Apply and extend previous understandings of multiplication to						
multiply a fraction by a whole number.						
c) Solve word problems involving multiplication of a fraction by a whole						
number, e.g., by using visual fraction models and equations to represent				_		
the problem. For example, if each person at a party will eat 3/8 of a pound of roast beef, and there will be 5 people at a party, how many pounds of				•		
roast beef will be needed? Between what two whole numbers does your						
answer lie?						
4.NF.C Understand decimal notation for 4.NF.C.5 Express a fraction with denominator 10 as an equivalent fraction with	or fractions,	and compa	re decimal f	ractions.		
denominator 100, and use this technique to add two fractions with respective						
denominators, 10 and 100. For example, express 3/10 as 30/100, and add 3/10 +				•		
4/100 = 34/100.  4.NF.C.6 Use decimal notation for fractions with denominators 10 or 100. For						
example, rewrite 0.62 as 62/100; describe a length as 0.62 meters; locate 0.62 on a				•		
number line diagram.  4.NF.C.7 Compare two decimals to hundredths by reasoning about their size.						
Recognize that comparisons are valid only when the two decimals refer to the same						
whole. Record the results of comparisons with the symbols >, =, or <, and justify the				•		
conclusions, e.g., by using a visual model.  Measure	l ement & Dat	a				
4.MD.A Solve problems involving measurement and cor			nts from a la	rger unit to	a smaller u	nit.
4.MD.A.1 Know relative sizes of measurement units within one system of units				J		
including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of						
measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. For example,					•	
know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as						
48 in. Generate a conversion table for feet and inces listing the number paris						
(1,12), (2,24), (3,36),  4.MD.A.2 Use the four operations to solve word problems involving distances,						
intervals of time, liquid volumes, masses of objects, and money, including						
problems involving simple fractions or decimals, and problems that require					•	
expressing measurements given in a larger unit in terms of a smaller unit.						
Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.						
4.MD.A.3 Apply the area and perimeter formulas for rectangles in a real world						
and mathematical problems. For example, find the width of a rectangular room					•	
given the area of the flooring and the length, by viewing the area formula as a multiplication equation with an unknown factor.						
	l

4.MD.B.4 Make a line plot to display a data set of measurements in		prei uaia.				
fractions of a unit (1/2, 1/4, 1/8). Solve problems involving addition and						
subtraction of fractions by using information presented in line plots. <i>For</i>						
example, from a line plot find and interpret the difference in length					•	
between the longest and shortest specimens in an insect collection.						
4.MD.C Geometric measurement: under	stand conce	epts of angle	e and measu	re angles.		
4.MD.C.5a Recognize angles as geometric shapes that are formed		J				
wherever two rays share a common endpoint, and understand concepts						
of angle measurement.						
a) An angle measured with reference to a circle with its center at the						_
common endpoint of the rays, by considering the fraction of the circular						•
arc between the points where the two rays intersect the circle. An angle						
that turns through 1/360 of a circle is called a "one-degree angle," and						
can be used to measure angles.						
4.MD.C.5b Recognize angles as geometric shapes that are formed						
wherever two rays share a common endpoint, and understand concepts						
of angle measurement.						•
b) An angle that turns through <i>n</i> one-degree angles is said to have an						
angle measure of <i>n</i> degrees.						
4.MD.C.6.Measure angles in w hole-number degrees using a protractor.						•
Sketch angles of specified measure.						
4.MD.C.7 Recognize angel measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole						
is the sum of the angle measures of the parts. Solve addition and						
subtraction problems to find unknown angles on a diagram in real world						•
and mathematical problems, e.g., by using an equation with a symbol for						
the unknown angle measure.						
	eometry					
4.G.A Draw and identify lines and angles, and cl		es by prope	rties of thei	r lines and	angles.	
4.G.A.1 Draw points, lines, line segments, rays, angles (right, acute, obtuse),			. ,		J	_
and perpendicular and parallel lines. Identify these in two-dimensional figures.						•
4.G.A.2 Classify two-dimensional figures based on the presence or						
absence of parallel or perpendicular lines, or the presence or absence of						
angles of a specified size. Recognize right triangles as a category, and						•
identify right triangles.						
<b>4.G.A.3</b> Recognize a line of symmetry for a two-dimensional figures as a						
line across the figure such that the figure can be folded along the line into						•
matching part. Identify line
